

Family Constellation Saturday

with Robert Zieve, MD

(certified by Mark Wolynn and Suzi Tucker
of The Helliger Learning Center)

What is Family Constellation Work?

A Family Constellation is a 60-minute group process that has the power to heal generations of suffering and unhappiness. Bert Hellinger, the founder of this work, studied and treated families for more than 50 years. He observed that many of us unconsciously "take on" destructive familial patterns of guilt, pain, anxiety, depression, alcoholism and even illness as a way of being loyal to our families.

Bonded by a deep love, a child will often sacrifice his own best interests in a vain attempt to ease the suffering or solve the "unfinished business" of another family member.

Constellation work allows us to untangle ourselves from these unconscious loyalties, and offers us the opportunity for a profound, concrete and lasting solution. Even if you are not having your constellation done in this group setting, those who attend and participate in the constellations of others still are able to experience a deeper understanding for these dynamics.

Because he understands the deep effects of these entanglements in health and illness, Dr. Zieve integrates the Hellinger Family Constellation work into his practice to help patients create healing movements for illnesses of many kinds. If you unable to attend a group constellation, you may also chose to do this profound work individually with Dr. Zieve at the offices in Prescott or Scottsdale.
